

Whereas, there is an agenda to implement comprehensive wireless network coverage, using radio waves instead of copper or fiber optic cable and transmitting radio signals through antennas, and is also known as “Wireless Networks”; and

Whereas, there is an agenda to implement a so named “Smart Grid”; and as said agendas are being, or are to be implemented, in the landmass known as Europe including the landmass known as Denmark; and

Whereas, there is an agenda of false information of various kinds regarding health, safety, privacy, and other various concerns or considerations, due to the direct or indirect effects of “Wireless Networks” and or some of its components, sometimes referred to as “2G”, “3G”, “4G”, “LTE”, “Wi-Fi”, “WiMax”, “5G”, etc.; and

Whereas, there is an agenda of false information of various kinds regarding health, safety, privacy, and other various concerns or considerations, due to the effects of the so named “Smart Grid” and or some of its components, including but not limited to, the wireless digital electrical devices utilized to measure electrical consumption, among other things, sometimes referred to as “Smart Meters” (also called AMI, or AMR); and

Whereas, the agendas of false information are being utilized to deceive lawmakers and safety regulatory organizations, et al., or in the alternative give plausible deniability to the same groups for those members of said groups, et al, that are complicit with the United Nations Agenda 21 and Agenda 2030 which in the Sustainable Development agenda to capitalize on all data of the citizens of the aforementioned landmasses through the “Smart Grid” agenda in order to expand Control including but not limited to the formation of the Global Government; and

Whereas, “Wireless Networks” and or some of its components, including but not limited to “2G”, “3G”, “4G”, “LTE”, “Wi-Fi”, “WiMax”, “5G”, etc., do cause severe harm of various kinds; and

Whereas, the so named “Smart Grid” and or some of its components, including but not limited to, “Smart Meters”, do cause severe harm of various kinds; and

Whereas, a person with full knowledge of a potential harm, whether caused directly by the person or not, and that person is endowed the ability and or duty to act upon the said knowledge in a way to avoid or otherwise mitigate the potential harm, and fails to do said actions, is liable for the inevitable harm caused, and or may be considered negligent at law.

Therefore you, have been given this notice, inclusive of the attached documents including government and scientific and medical studies, all of which constitute full disclosure of the “Wireless Networks” agenda and so named “Smart Grid” agenda as of the date of this notice. This notice in full will be made public and available on www.smartmetersdanmark.com to anyone who chooses to use it. This notice in full has been delivered to all human rights organizations, appropriate members of Parliament, media outlets as well as the EU Commission,

Respectfully, and with the full knowledge you will noticeable react to the increasing evidences of the harm these devices do, or act in a way that would protect or ensure a healthy, human rights fulfilled life for the citizens you govern.

I am writing to address the serious public health concerns of Radio-frequency radiation (RFR) exposure from the unprecedented, reckless employment of wireless technology in Denmark, and the mining and storing of private and person data for the purpose of capitalism, which is being expanded; and to seek leadership of Denmark regulators in the absence of European Union Commissions commitment to public health. This document serves as a:

1. Formal complaint to the Danish Health Minister Ellen Trane Nørby, Sundheds-Styrelsen, Directorate of Health, Søren Brostrøm and the Minister of Justice, Søren Pape Poulsen, against the:
 - a. Danish Ministry of Health and Justice for authorizing Nord Energi, Radius Elnet A/S (Radius) and Energinet to negligently install wireless smart meters without prior safety testing; and continuing to approve the mandatory and involuntary exposures to what WHO/IARC classifies as a 2B carcinogen, same as DDT and lead, which is in the process of potentially being reclassified as a human carcinogen; (1) (2)(3)(4)(5)(6) and violates the Torture Convention implemented in 2001 and the European Convention on Human Rights Article 5 implemented on 1 July 1992, to name a few.
 - b. Sundheds-Styrelsen for failing to recognize that “adverse human health effects occur at far lower levels of EMF/RF/MW radiation exposure than those that cause noticeable heating” (the gauge for public exposure guidelines). Recognition of the hazards and abatement of Radiation from Smart Metering programs and publications; lack thereof constitutes a violation of UN, EU and Danish Human Rights guaranteed by law, for allowing exposures to multiple and chronic RFR, a known Group 2B Carcinogen, and possible neurotoxin and genotoxin.
 - c. Radius Elnet A/S (Radius), Nord Energi, Energinet, for falsely advertising and marketing this device to be safe while covering the fact that it is a data mining, surveillance device with devastating effects on humans.

2. Formal appeal to Danish Health Minister Ellen Trane **Nørby**, Sundheds-Styrelsen, Directorate of Health, Søren Brostrøm and Head of Unit for Radiation Protection, Mette Øhlenschläger for:
 - a. An immediate safety review of RFR in accordance with the Nuremberg Code; and
 - b. A moratorium on the installation and or activation of non-transient wireless networks including, but not limited to, Wi-Fi, WiMax, 4G, LTE, 5G and Smart Meter infrastructures, until determined safe, including, but not limited to, Danish and European Parliament and Council.

This document holds proof of the health and safety issues associated with RFR wireless networks and ‘smart’ meters. Besides the health effects including over 140,000 new cancers, Autism and Dementia disorders, birth defects, leaky blood-brain-barrier, sterilization, and DNA breakage, smart meter wireless technology creates cyber security problems - leaving homes and communities vulnerable to hacking including the mass data mining, collecting, processing and storing personal information including but not limited to: name, address, telephone number, e-mail address, cpr-number, place of consumption and, if applicable, related business (historical, expected and read), connection status, payment conditions and information about electrical installations and power plants on your property, ordering goods or services, messages from you, log-in information, information about your IP address, etc.; privacy issues - real-time data on energy usage reveals private activities within the home, with no guarantee of who will have access to that data as all data is open to third parties including Energinet and is accessible by all governments of the world; as well as causing proven higher bills. In Canada, “80% of Smart Meter users complain of higher bills within a year of installation, often more than 50% higher.” This is also seen in the USA and every country establishing this RFR wireless or “Smart” grid. (3) (4) There are no safe levels for children. “Apply the precautionary principle to protect the world’s richest resource – our children.” (7) Research has shown the effects on children are devastating, inhibiting learning, social skills besides the medical effects listed above. The future of any country lies

in the education and health of the people in it. The future Denmark is pursuing is one of illness, retardation, and death. “To not act today may prove a disaster tomorrow, and such lack of action may again result in the classical late lessons from early warnings.” (6) “The literature raises serious concern regarding the levels of radio frequency... exposures produced by ‘smart meters’ to warrant an immediate and complete moratorium on their use and deployment until further study can be performed.” (8)

While the EU Commission and the Danish Government do not recognize the Nuremberg Code any longer nor the hazards of RFR radiations, Danish and European Member State Citizens are left unprotected against this biologically harmful radiation which is being forced on them without knowledge of the effects and reality of the systems being put in place. While the Danish Board of Health refuses to acknowledge proofs of the dangers or associate with facts, it has failed its purpose and the citizens of Denmark and should be investigated on the grounds of treason. Denmark is working to be a leading country in the so named Smart Cities, Sustainable Development, United Nations agenda for global governance, the citizens and the rights of the citizens are being thrown away.

When the citizens of Denmark have no right to a natural and healthy life, there are no human rights left. We urge all parties involved to acknowledge the ever increasing amount of evidence proving the dangers of the Smart Metering Grid and to reassess the Smart Metering enforcement passed by the EU Commission in 2013 and to cease the poisoning of the Citizens of Denmark and all members of Europe.

We look forward to appropriate and timely actions taken on behalf of the citizens you are responsible for.

Respectfully,

A Citizen of Denmark Who Stands Against Violators of Human Rights.
